Worst game ever. Waste of money.. I'm decent friends with one of the developers, so when he mentioned a game he was working on with his studio, I was excited. He gave me an alpha build of the game, so I categorized my impressions. Since it was an alpha, I wasn't expecting much, and first impressions were not great when the Menu sped up to 10000% because they forgot to disable Admin mode for the alpha build. However, after around an hour, I could give it a positive review because besides a few glitches, it's a fairly solid game with satisfying controls. Stretching across the galaxy might take awhile, but you feel like you're actually doing something either way, and the space combat is satisfying, feeling almost like a multiplayer version of Asteroid! While there are a few problems, like how the lazer based ships feel like pointing a lazer pointer at the enemy, it's a competent game, and is only going to get better as it is only in Alpha. I would pick it up, but don't play too much of it until the Beta, because then it will really start to shine!. This is the most incredible puzzle game of all time. Do not listen to Ryan Case, he's a moron. Awesome addition to an already great variety of bikes and classes AND tracks!. I'm not sure how I stumbled across this game, but I'm extremely happy that I did.

It was a rather enjoyable time. It reminded me of the movie Fantastic Mr. Fox in a way, although that could be due to "HOW" I was playing it. The characters are rather enjoyable, the story was very easy that anyone could follow along.

Although a little short, and the game has a few flaws, I think it leaves you with a sense of happiness and a smile on your face.

Here's my voiced play through.

Amazing graphics, fun and scary gameplay, and difficult! Everything I could have asked for in a maze game. I would definitely recommend this to people who like platformers, horror, survival, and people who like finding things in video games!! Also, it is cheap which makes it a whole lot better. The only thing I wish there were more monsters (like NEW new monsters, the amount of them I don't really mind. I'm talking new designs and sizes. Also I wish some monsters roamed the entire place, not just one area), but besides that the game is amazing! I definitely recommend this game!. This game is so cool! It reminds me of "Back to the future" movie. Good job Erathor, you have made a really nice game! Btw you have to fix some things, like movement it's not so nice.. A truly curious specimen.

One of those that hope to be special by being specially bad

It's like somebody told an alien what "a game" is, and then he made one.

It has powerups, bosses, enemies, different levels, music.

Don't get me wrong it's "technically a game" and it is superbly optimized, and will run on almost every PC.

This is all positive information that can be said

It lacks literally ALL of those sudden things, that one can find enjoyable at any level.

In sound design: Things like death, weapon sounds, game over music, different boss music.

In game design: death animations for everything, pause function, different enemy patterns, enemy attack, adequate hit boxes.

And much, much more.

You can literally go and play better flash game made by 13yo for free.

This program can barely be considered a textbook definition of a game.

Something that pretends to be made in simpler older era of gaming where anything was ok.

But point is IT'S NOT.

IT'S NOT OK to put something like this for sale.

IT'S NOT ENTERTAINING in any way to play it.

IT'S NOT DECENT to scam people out of money this way.

IT'S NOT THAT ERA ANYMORE.

Time to grow up and have some♥♥♥♥♥standerts, lads.

Because history loves to repeat itself if forgotten.

THAT ERA ENDED AS A♥♥♥♥♥MARKET CRASH.

In conclusion:

Part of a program.

It appears, it's unpleasant, everyone rattles about it, and then it's gone.

Except for a fact that its creator makes a quick buck from dumbasses like me who bought it.

Prase be!

Steam refund.

Don't be a dumbass, don't feed jackass.

P.S.

Note to gaben

Pls make "IT'S A SCAM" button.. very very complicated, no manual in the bus folder, can't get the plates with destination, total failure, do not buy!. hoi zwarte

wie dit leest is dom. A typical puzzle game with hentai(dlc) girls.

Nothing unusual

I think this game needs a steamcard :). Tried it and couldn't get past the problems. Game is not finished is what I can say. Its another vr with a lot of potential but is rushed out the door. More time spent could have made this great. It definitely has the vibe of alien isolation which is awesome but again its just not finished. A.I spawn random in front of you for immediate death that's unavoidable and have to start over. Clipping through walls when locomotion because I hate teleporting. Bad textures unless you use ultra settings. Don't even try anything below like many have said its super blurry without it making it almost unplayable or enjoyable.

Again more time spent and these coulda have been a great vr title.

Were all craving vr content but we all don't need a bad game too.
